The AL(R)17/19 potentiometers in 22 mm housing are suitable for applications where a precise and economical multiturn potentiometer is important.

- Economical and precise multiturn sensor with numerous options
- Simplified installation due to connector version
- Version ALR17/19 with integrated slipping clutch

The shaft diameters Ø6,35 AL(R)17 and AL(R)19 Ø6.00 mm are equipped with a screwdriver slot. In addition, an optional integrated slipping clutch protects the potentiometer from damage by overrunning the end stops and facilitates the zero point adjustment. The potentiometer is available in 3, 5 or 10 turn version (optional in 1, 2, 4, 6, 7 or 8 turn). The radial gold-plated connection pins are suitable for flat connectors (2.8 mm according to DIN 46247 part 3) and the connector version simplifies the mounting.
